Videofied

THE WIRELESS ALARM SYSTEM WITH COLOUR VIDEO VERIFICATION

BUSINESS AND OUTDOOR PROTECTION

Videofied panels have revolutionized the security market for over ten years.

Our new product generation brings you colour video verification (Indoor MotionViewer).

Detects intruders

Upon an intrusion, MotionViewer cameras take a ten-second video.

The video is immediately transmitted **to your Alarm Receiving Centre (ARC)**.

The operator at the ARC watches the video and instigates priority response in the case of a video verified intrusion.

WIRELESS VIDEO SECURITY

- The most advanced security system with video verification

- Bi-directional radio range in 920 MHz operating frequency

  - IP/GPRS alarm transmission

- 4-years battery life

THE WIRELESS ALARM SYSTEM WITH COLOUR VIDEO VERIFICATION

RESIDENTIAL MARKET AND SMALL BUSINESS

Videofied panels have revolutionized the security market for over ten years.

Our new product generation brings you colour video verification.

Detects intruders

Upon an intrusion, MotionViewer cameras take a ten-second video.

The video is immediately transmitted **to your Alarm Receiving Centre (ARC)**.

The operator at the ARC watches the video and instigates priority response in the case of a video verified intrusion.

WIRELESS VIDEO SECURITY

- The most advanced security system with colour video verification

- Bi-directional radio range in 920 MHz operating frequency

  - GSM/GPRS alarm transmission

- 4-years battery life

VIDEOFIED SYSTEM

video 4 all provides the reassurance and convenience of remote video request and review (arm, disarm, request videos and photos…).

Compatible with Iphone and Android.

The wireless system with 2-way voice and colour video verification

The Indoor MotionViewer (IMV) integrates a passive infrared motion sensor, a digital video camera and infrared illuminators for night illumination.

Thanks to its wireless capability, the Videofied system is easily installed. It also transmits wirelessly through the GSM/GPRS cellular network.

Advantages of Videofied

✓ **A simple installation :** Programming is easy thanks to the radio keypad. No programming tool is needed.

✓ **A 100% Bi-directional radio :** Advanced wireless radio technology. The remote keyfob confirms directly with an acoustic beep arm and disarm actions. So you can arm or disarm your alarm system from your car and receive confirmation.

✓ **A full range of devices :** The Videofied range offers a large choice of radio devices, keypads and badge readers for arming, indoor and outdoor sirens as an acoustic deterrent, PIR detectors for intrusion, all completely wireless.

Compatible with Iphone and Android.

The XT & XTO systems with video verification allow security professionals to initiate a priority response.

Companies & small businesses
Especially designed to secure companies and small businesses.

XT panels can be used standalone or in XTender mode : allows video verification to be added to an existing alarm system.

Outdoor sites
The XTO system is especially designed to secure outdoor environments (yards, construction sites, GSM towers...)
