

Videofied Wireless Video Alarm

Traditional 'Blind' Alarm System

Advantages

Video verification of an intrusion enables Police to be deployed immediately. No false alarms, and no false alarm fines.

Military-grade Wireless communication means no phone lines, which are costly to run and vulnerable to attack. Secure two-way communication between the Panel and up to 24 Sensors mean Videofied can be easily relocated without destructive re-installation.

Videofied has an internal battery life of up to 4 years, and is not affected by power disruptons of any kind.

Videofied Outdoor Motion Viewers are weatherproof and the self-illuminating IR Cameras operate in any light. This could translate into saving on security guard patrol costs.

- No phone line rental
- No phone call costs
- Low installation costs
- Reduce Guard Patrols and responses
- No false alarm fines
- No internet connection or network configurations.
- Relocatable
- Videofied.
