

NASKAM SECURITY

NASKAM successfully protects Critical Infrastructure, Government Buildings and High Risk Assets using Videofied technologies. Having developed a long standing relationship with police, NASKAM reports overwhelmingly significant result of 12 known arrests in the past 6 months using Videofied.

NASKAM Security on Queensland's Sunshine Coast is one of the first Australian Monitoring Stations to pioneer professional monitoring of the Videofied technologies.

Offering Video Alarm Verification using Videofied Technology, NASKAM has shown first hand the effectiveness of video alarm verification of intrusions and has further developed their long standing and positive relationship with local police. Having tested the product NASKAM has now deployed and is monitoring Videofied products across various states around the country with Critical Infrastructure, Government Buildings and High Risk Assets topping the list of protected sites.

In the past 6 months alone, NASKAM has had more than 12 arrests or apprehensions by state based Police and security services due to the deployment of Videofied. On one such occasion Videofied led to the apprehension of several youths breaking into a Local Government facility which had been previously targeted. NASKAM deployed the Videofied product and within only a few days Video Verification of an Intrusion from Videofied resulted in a rapid response by local police. Within minutes Police arrived onsite to arrest the offender/s whilst they were still in the process of committing the offence.

Chad Wright, NASKAM Security's General Manager said "For the past 5 years we have been providing Live Video Monitoring Services across the country and when we were introduced to Videofied we were excited to complement those services with an Alarm Based Video Verification Product that was both cost effective and easy to install. As an added bonus Videofied provided the ability to deploy the product completely wirelessly with better coverage and penetration than just about any other wireless security product. We tested the product extensively and it proved reliable which has resulted in our Control Room monitoring nearly 100 Videofied sites already in just a short period of time. In the right location and when installed correctly, Videofied has proved extremely successful, it has been well received by the Police Service and the ability to confirm and report Crimes in Progress has greatly enhanced our reputation and quality of services available."
